

SEBO COMMERCIAL SERIES

MADE IN GERMANY

THE INTELLIGENT CHOICE

SEBO COMMERCIAL SERIES – BUILT FOR PROFESSIONALS

SEBO – THE PROFESSIONAL CHOICE

A Company steeped in skill, intelligence and pure genius spanning over 25 years brings us the SEBO Commercial Series upright vacuum cleaners. SEBO, the global leader in commercial uprights, has sold over 3 million vacuum cleaners since its foundation.

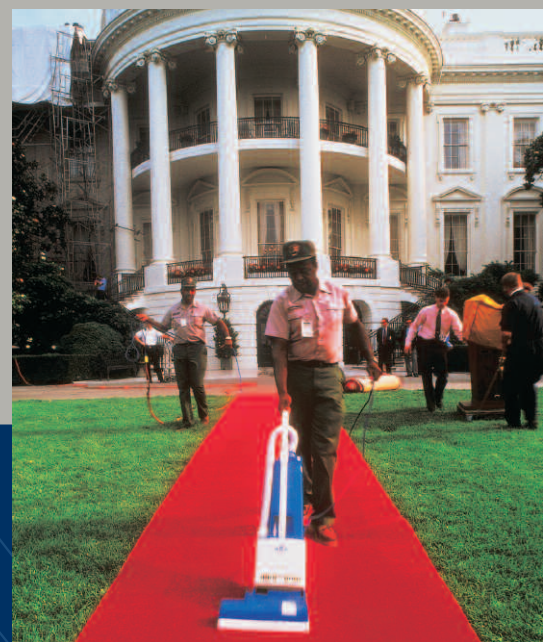

SEBO vacuum cleaners are the intelligent choice for all commercial floor care. They can be relied upon to consistently provide professional cleaning performance, day in, day out. Renowned for their reliability, durability and outstanding performance, their “**Made in Germany**” label is a worldwide symbol for excellence.

SEBO gives you...

- › Superb cleaning performance
- › Easy maintenance
- › Quality construction
- › Advanced design
- › Tough on dirt
- › High filtration as standard
- › User friendly

Carpet manufacturers recommend SEBO....

....and not just for red carpets. Although many of the worlds' corridors of power are cleaned with a SEBO, using a SEBO vacuum cleaner will ensure the appearance and longevity of any carpet or flooring whether it's The White House, The Kremlin or The Red Lion!

- > 4-level height adjustment

SEBO BS 46

- > 200W brush motor
- > 46cm cleaning head
- > Other features as per BS36

QUALITY DESIGN & CONSTRUCTION

Built for professionals

The SEBO BS 36/46 and the new DART vacuum cleaners have been developed to give excellent performance, outstanding reliability and easy maintenance.

Flat Out

Their ability to clean when flat and their low profile 'L' shape cleaning heads enable the BS & DART vacuum cleaners to reach under furniture and clean right up to skirting boards.

Easy brush change

Both the SEBO BS 36/46 and DART are purpose built for commercial use. Professionals need a machine which is versatile, simple to maintain and comfortable in sustained operation.

They can clean large areas quickly and without fatigue.

With powerful suction and brush action they can lift carpet pile and remove deeply embedded dirt and grit that lesser machines leave behind.

SEBO BS 36/46 RELIABLE PERFORMANCE

Quality Construction

The SEBO BS 36 and 46 are built to last using the best materials and design. Dependable and rugged machines, they are ideal for heavy duty use. The 36 and 46cm brush widths are perfect for medium to large sized areas.

Tough on Dirt

The SEBO BS 36 and 46 are built to work effectively, and will clean thoroughly, day after day.

High Filtration as Standard

SEBO 3-layer bags are the best available for airflow, strength and filtration. A Hospital Grade Filter and a cloth bag are also available.

User Friendly

The comfortable handle grip, low handle weight, and easy movement enable long periods of fatigue free use. The flat-to-floor design and telescopic tube system give all round cleaning versatility. The 14" (BS 36) and 18" (BS 46) cleaning widths provide fast cleaning of large areas.

Ultra Clean

The non-slip toothed belt and electronic height control guidance ensure superior carpet cleaning results. 3-layer sealable bags, multi-stage filtration (optional Hospital Grade Filter) and low noise in operation (68dB), minimise environmental pollution.

Service friendly

Changeable brush strips, low cost bags and filters, modular construction and reasonably priced, readily available parts make the BS 36 and 46 easy and economical to maintain.

Design Quality

Electronic overload protection protects the belt and brush motor. The belt is fully enclosed so that it is sealed from dirt. A by-pass valve protects the suction motor. A security system ensures that a bag and motor filter are fitted before the machines can be used. Combined with the use of the highest quality components and materials, these features ensure the the BS 36 and 46 offer a long and trouble free operating life.

SEBO DART VERSATILE VACUUMING

Fast, light and powerful

The DART extends the SEBO range, offering professional performance in a lightweight, versatile and easy to manoeuvre machine. The SEBO DART is designed to be agile, user-friendly and to achieve superb cleaning results quickly, easily... and economically. With two brush widths available – 31cm (DART 1) and 37cm (DART 2) the DART is ideal for small and medium sized areas.

Quick release cable

The quick-release cable hook is designed to be flush with the rear of the DART, letting the machine go as low as possible for under furniture cleaning. A 9.5m cable length allows for an extensive cleaning range.

The "Flex" neck of the DART gives 90° vertical and 180° horizontal movement, providing superb manoeuvrability for fast cleaning around obstacles.

Detachable suction unit

When detached from the power head the DART transforms itself into a lightweight, powerful suction machine which can be carried around with its comfortable carrying handle.*

Easy and hygienic bag change

The bag drops easily into position and is firmly fixed in place when the cover is closed. The sealing cap ensures that all dirt and dust is safely secured when handling the bag.

Air filtration – Design and function as one

The DART's advanced S-Class filtration system also gives it a distinctive appearance. The large surface area of the exhaust filter diffuses the airflow and also absorbs motor noise.

OPTIONAL ACCESSORIES

1. Attachment Clamp*

Use to fit an appropriate attachment to the machine. Two can be used.

2. Crevice Nozzle*

Reaches into narrow spaces.

3. Special Upholstery Nozzle

Flat for vacuuming the seams of upholstery and stair cleaning.

4. Dusting Brush

Has long soft bristles for effective dusting of grooves, etc without causing damage to delicate surfaces*.

5. 490mm Straight Tube

Gives greater reach, for example, to high ceilings.

6. Stair & Upholstery Turbo Brush

Air driven rotating brush for small or awkward areas. Lifts carpet pile. Gives superior fibre/hair pick up.

7. Flexible Extension Hose

Enables a total reach of up to 6 metres*.

8. Radiator Brush

Fits onto the end of the crevice nozzle. For dusting/cleaning into narrow spaces.

9. Floor and Wall Brush

For hard floors which are either too rough or too delicate for an upright and for rapid dusting of textured walls/ceilings.

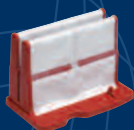

10. Cloth Bag*

A re-usable cloth bag is available. We recommend that it is used in conjunction with the Hospital Grade Filter.

11. Hospital Grade Filter*

Large surface area electrostatic filter – upgrades filtration and provides greater motor protection.

12. SEBO Fresh – Air fresheners

Perfumed capsules emit a pleasant aroma as you vacuum.

* Standard with DART

+ BS 36/46 only

The DUO dry carpet-cleaning system

SEBO offer a complete carpet care solution. The vacuum cleaners remove loose and dry matter. For soiling and stains, we provide the Duo system. Cleaning without using water, it is effective and avoids wet cleaning problems such as carpet shrinkage, adhesive damage, smell and long 'area out of use' periods due to lengthy drying times.

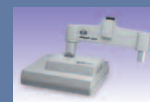

The Duo system comprises a brushing machine, the Duo, and carpet cleaning powder, duo•P. The Duo brushing machine features twin contra-rotating brushes which open up the carpet pile and work the duo•P carpet cleaning powder deep into the pile and around every fibre.

Before Cleaning

After Cleaning

Effective brush action

With the **dopple**, two standard **duo** machines can be linked together to create a 70cm (28") machine

Duo•P one idea – many advantages

Duo•P carpet cleaning powder consists of thousands of micro-sponges which contain safe solvent for greasy soiling, a neutral shampoo for non-greasy soiling and an anti resoilant to delay re-soiling. As the powder is brushed through the carpet it absorbs soilage leaving the carpet clean, soft and fresh. When vacuumed away, the carpet is ready for immediate use. Duo•P also has anti-bacterial properties and is proven to eradicate dust mites.

SEBO Clean Box – the ideal spot cleaner, all you need to do is...

- > spread a small amount of duo•P powder onto the soiled area,
- > gently work the powder into the carpet using the brush provided within the lid of the SEBO Clean Box,
- > leave it to do its work for approximately one hour,
- > vacuum away

The lid of the duo•P powder box doubles as an easy to use brush
