

CLEAN and CLEVER PROFESSIONAL

Green Air

Multi-Phasing Refill Cartridges With
Sub-Micron Fragrance Technology

Features and Benefits

- **VOC exempt**

Green Air is completely free of any solvents, propellants, HFCs and harmful volatile organic compounds (VOCs).

- **No batteries required**

All it needs to work is natural airflow. The refill is 100% organic and biodegradable and the dispenser is 100% recyclable.

- **Sub-micron technology**

Green Air particles enable superior fragrance delivery, yet are sized typically below 1.0 micron. This means they are much smaller and lighter than the particles in other fragrance systems, remaining airborne for many hours.

- **Multi-phasing**

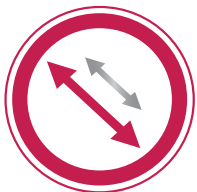

The Green Air ceramic capsule is infused with high quality perfumes, then complemented by an integrated internal fragrance core. These combine and diffuse powerful key fragrance notes that are subtly different.

- **Just three parts**

The technology behind Green Air is packed into one powerful refill component, so we've done the hard work for you – no fuss, just fragrance. A fully recyclable retaining clip attaches the refill to the dispenser.

- **No liquids**

Green Air contains no liquids so won't spill, even if it is knocked over.
